Documents
for Jira Cloud & Data Center

Stay organized.
Raise your efficiency

Product Description

Documents for Jira is a Document Management System (DMS) that allows storing and managing files in Jira in an easy, structured and secure way. The app extends the Jira projects by adding a tab named Documents. On this tab, the project members can post and access the documents related to that project.

Competitive Advantages

➤ All the documents and metadata are stored within the Jira instance
➤ Secure & Reliable, Cloud Fortified
➤ ISO 27001 Certified Company
➤ Outstanding customer support
